

Australian artist to showcase his work in Bandra

The painting exhibition will start from March 27 till April 1 at Out of the Blue
Westcoast Correspondent

Australian artist Vincent Fantauzzo will exhibit his work at Out of the Blue, Bandra starting March 27 till April 1, in association with Ok India. Vincent, born in the UK and now a resident of Australia, is specifically interested in the artists of the Italian Renaissance and the vanishing art of figurative painting. Over the past six years he has studied traditional painting techniques in Australia, particularly as they relate to the use of light and perspective.

While his interest is in the traditional aspects of painting is fixed in the past, he believes his work has a distinctly modern aesthetic that prevents it from falling into simple repetition of ex-

isting styles.

In his series of work that will be exhibited at Out of the Blue, he will explore the concept of the multiplicity of fate and the way in which any individual is required to make decisions and, accordingly, take action, without always having an opportunity to consider the possible consequences.

Also this collection draws particular inspiration from mythology and literature- the stories in which one, seemingly insignificant decision sets a series of events in motion, altering the central characters lives profoundly. The timeless quality of these stories and their continuing popularity in the 21st century speaks of the universal nature of human existence.
